

DM2 Software's SMARTTruck Integration

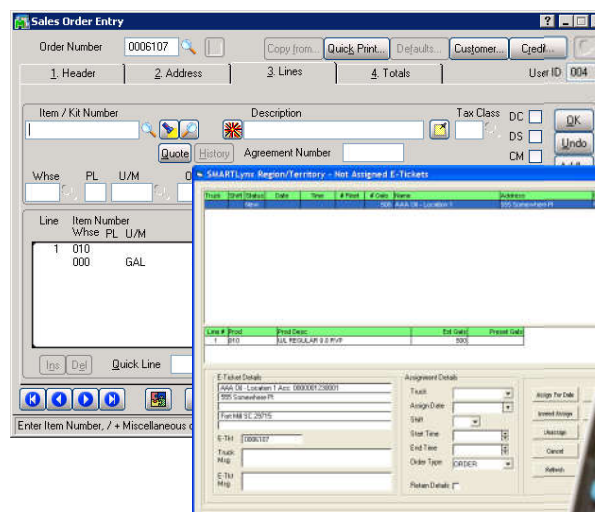

DM2's SMARTTruck Integration Features:

- Automatically send Sales Orders to SMARTTruck Dispatch and Driver Handhelds instantly
- Orders can be entered in either system and automatically synchronized
- Real-time Credit Checks regardless of how orders are entered
- Orders created in DM2 Dispatch Scheduler can be automatically sent to the SMARTTruck system
- Includes Shipping Instruction memos
- Order changes in DM2 are automatically sent to SMARTTruck depending on order status
- Automatically populate Bill of Lading information from SMARTTruck
- Provides summary or detail transaction information for fleet fueling invoicing

In partnership with **SkyBitz Petroleum Logisitcs** (formerly SMARTLogix™), DM2 has taken truck automation to the next level. SkyBitz's SMARTTruck solution keeps your petroleum distribution operation running smoothly by simplifying dispatch and tracking product movement throughout the entire delivery process. Real-Time inventory information, GPS tracking and exception reporting are just a few examples of the feature-rich SMARTTruck solution. By adding the SMARTTruck Truck Automation module to your DM2 *Petroleum Insights* back office/ERP system, you can further streamline your delivery and fleet fueling operations while improving your cash flow.

Streamline operations and eliminate double entries and keying errors by automatically sending priced and taxed orders from your Sales Order module to the SMARTTruck Dispatch module and Handheld driver units instantly. Or, enter orders into the SMARTTruck Dispatch module or on the handheld units. Either way, both systems are automatically synchronized and credit is checked in real-time. Provide fleet (wet hosing) accounts with consolidated, summary invoices via the Sales Order module or send per vehicle transaction information to DM2's CardLink module for detailed invoicing.

Improve cash flow by updating the Sales Order module instantly after each delivery is made via SMARTTruck's Wireless technology. Operators can easily see which deliveries are ready to be billed and select and convert orders into invoices with just a few mouse clicks.

DM2 Software's SMARTruck Truck Automation Integration

Eliminate Manual Entries

Eliminate double entries and keying errors by automatically populating Customer Account or ShipTo addresses, Sales Order, Bill of Lading and Inventory Item Maintenance screens between systems in real-time.

Improve Inventory Control

Maintain up-to-the-minute inventory control with real-time wireless communications. Also integrates with SMARTLogix's SMARTank tank monitors.

Increase Cash Flow

Reduce the time from delivery to invoice by automatically capturing delivery information in real-time. Capture signatures digitally to verify proof of delivery.

Increase Margins

Increase dollar margins per gallon delivered by identifying *Best Buy* pricing opportunities and maximizing delivery routing with GPS logistics tracking.

Reduce Paperwork

Eliminate the paperwork associated with your order entry, dispatch and delivery functions.

ABOUT

SkyBitz is a leader in commercial telematics with businesses focused on providing rapidly deployable solutions for enterprise and local fleets, tank monitoring and petroleum logistics. SkyBitz' end-to-end solutions can dramatically increase customer efficiencies, lower operating costs and unlock new capacity to generate revenue from their existing investment. As an innovator, SkyBitz was the first to bring a SaaS (solution as a service) model to the long-haul trailer tracking industry, making it easier and more cost effective for customers to have the data and analytics they require without the high overhead of hardware. SkyBitz was the first to launch a tracking solution specifically designed for intermodal chassis. And most recently, SkyBitz launched the only two-way global satellite communication and IECEx/ATEX Zone 0 certified tracking device for the oil and gas industry. On a daily basis, our customer success teams are focused on delivering meaningful and rapid ROI through comprehensive turnkey deployment services.
