DM²
software, inc.

Nov. 17th,
2011

For years now, our customers have found high value in using our SQL data warehouse for reporting. This allows for fast reporting from normalized sales data and other key MAS data tables using Excel tools. Most of you are very comfortable slicing and dicing data using Excel and with SQL Data Warehouse, the challenges of linking unfriendly tables have been removed.

Nov. 17, 2011

Now we take it a step further of bringing this value added information and relating it to the SageCRM information for forecasting, pipeline opportunities, communications and activities with your customers and prospects called Touches

A buzz word in the Sales and Marketing world today “Touches”. There are many articles all over the Internet and in various Sales Trainings about the success of retraining current customers, growing a share of wallet from current customers and growing new business based on the amount of Touches or activities with Customers.

Nov. 17, 2011

While SageCRM does a great job of capturing activities by customer, many times we need to see a bigger picture or the whole picture. We have developed some SQL reporting tools to accomplish this. I will be showing you these today.

Nov. 17, 2011

In addition we have had many request to see Actual Sales Dollars and gallons in SageCRM by Customer/Company by Business line or Product lines. With the power of SQL as the driving force for SageCRM we have developed a new Tab in SageCRM reading from your SQL Data warehouse tables for booked sales. You can quickly see Period over Period comparison. This removes the challenges of connecting and reporting from within MAS. Our goal is to make SageCRM be your one stop show for information.

Nov. 17, 2011

The power of SageCRM and tools like Microsoft SQL and Excel allow you to get all the information you need for success. Gives you greater insight in to current activities with your sales people, greater information to assist in coaching and greater visibility into future pipeline

Nov. 17, 2011

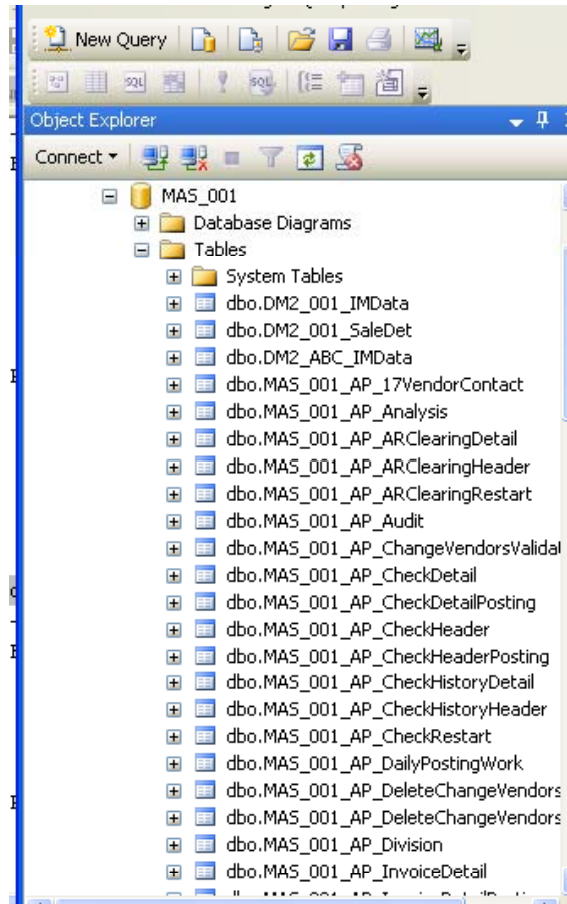

Forecasting, a standard feature in SageCRM. Previously we had to keep our forecast and goals outside the system.

Now we can capture that data in SageCRM. This allows us to do analysis on Forecast/Goals and Actual

Nov. 17, 2011

SQL Data Warehouse Push from MAS samples

If you do not have the SQL Data warehouse push from MAS to SQL today, please contact DM2 at 800-866-5151

Someone from our Professional Services group will be glad to assist you.

Many Manager and Owners are asking:

- How do I know what progress my salespeople are making
- How do I know they are making their goals
- How do I know they are growing the book of business
- How do I know they are growing their pipeline

Want to Learn How to Improve Your Cardlock Profitability? - Join DM2 Software for our

Join us for a Webinar on December 15

REGISTER NOW

Space is limited.

Reserve your Webinar Seat Now at:

<https://www1.gotomeeting.com/register/314382737>

DM2 Software invites you to attend our "Cardlock Best Practices" webinar on December 15, 2011 at 1:30pm Central Time. Join Professional Services Consultant, Emily Naylor, to learn how employing the best practices DM2 has developed as a result of working with hundreds of cardlock marketers can help you improve your cardlock profitability. This webinar will focus on the most effective methods to:

- Set-up local, remote and retail pricing
- Control margins
- Set-up and maintain network cards
- Process transactions from multiple networks
- Reduce paperwork
- Prevent fraud and theft

You will also learn how you can improve your customer service, reduce your labor costs and free your employees up to focus on growing your business by adding DM2 Software's eCardLink Web Portal to your web site to give your cardlock customers self-service access to their CardLink information 24 hours a day, 7 days a week from any web browser.

Space is limited, so register today!
