

DM2 Software's *Petroleum Insights* Truck Automation Interfaces

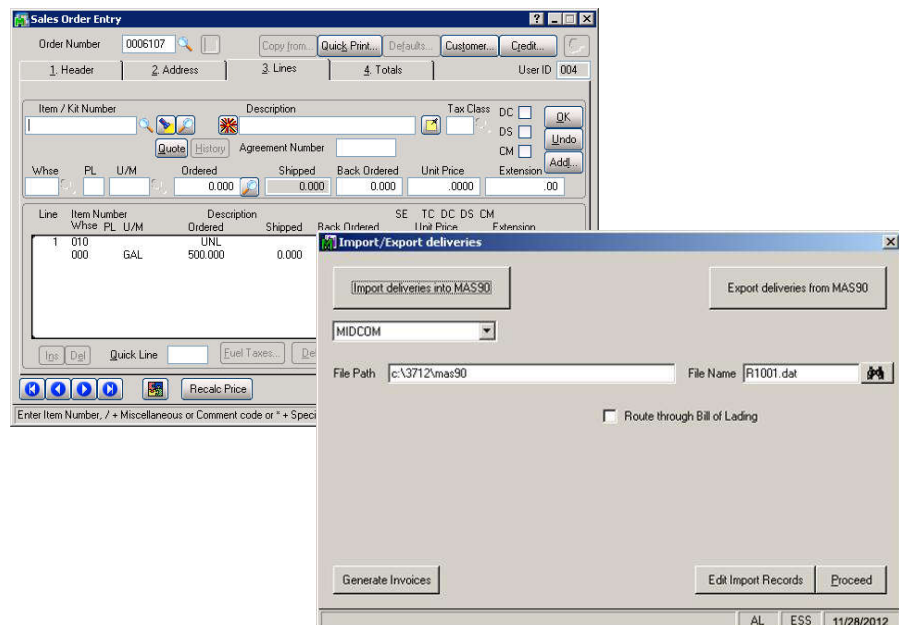

DM2 Truck Automation Interface Features:

- Interfaces are available for:
 - MID:COM
 - SMARTLogix
- Upload Sales Orders to Dispatch and Driver Handhelds
- Orders can be entered in either system and uploaded or downloaded
- Orders created in DM2 Delivery Scheduler module can be downloaded into your truck system
- Include Shipping Instruction memos
- Automatically populate Bill of Lading information from the truck system (available with SMARTLogix Interface only)
- Provides summary or detail transaction information for fleet fueling invoicing

Tired of entering orders into both your DM2 *Petroleum Insights* and truck automation systems? DM2's Truck Automation Interfaces keep your petroleum distribution operation running smoothly by simplifying dispatch and tracking product movement throughout the entire delivery process. Accurate inventory information and exception reporting are just a few benefits this feature-rich solution has to offer. By adding a Truck Automation Interface to your DM2 *Petroleum Insights* accounting/ERP system, you can further streamline your delivery and fleet fueling operations while improving your cash flow.

Streamline operations and eliminate double entries and keying errors by uploading (upload methods vary by interface—consult your DM2 sales representative for more details) priced and taxed orders from the your *Petroleum Insights* system's Sales Order module to the truck system's Dispatch module and Handheld driver units. Or, enter orders into the Dispatch module or on the handheld units. Either way, both systems are automatically synchronized and credit is checked. Provide fleet (wet hosing) accounts with consolidated, summary invoices via the Sales Order module or send per vehicle transaction information to DM2's CardLink module for detailed invoicing.

Improve cash flow by updating the Sales Order module after each delivery is made. Operators can easily see which deliveries are ready to be billed and select and convert orders into invoices with just a few mouse clicks.

The image shows two overlapping software windows. The background window is titled "Sales Order Entry" and displays a form for entering order details. It includes fields for Order Number (0006107), Description, Tax Class, and a table with columns for Line, Item Number, Whse, PL, U/M, Ordered, Shipped, Back Ordered, Unit Price, and Extension. The foreground window is titled "Import/Export deliveries" and contains buttons for "Import deliveries into MAS90" and "Export deliveries from MAS90". It also has a dropdown menu for "MIDCOM", a "File Path" field with the value "c:\3712\mas90", a "File Name" field with "R1001.dat", and a checkbox for "Route through Bill of Lading". At the bottom of this window are buttons for "Generate Invoices", "Edit Import Records", and "Proceed".

DM2 Software's Truck Automation Interfaces

Eliminate Double Entries	Eliminate double entries and keying errors by automatically populating Customer Account or ShipTo addresses, Sales Order, Bill of Lading and Inventory Item Maintenance screens between systems.
Improve Inventory Control	Maintain inventory control by interfacing your truck automation system with your <i>Petroleum Insights</i> system.
Increase Cash Flow	Reduce the time from delivery to invoice by automatically capturing delivery information.
Improve Margins	Increase dollar margins per gallon delivered by identifying <i>Best Buy</i> pricing opportunities and maximizing delivery routing.
Reduce Paperwork	Eliminate the paperwork associated with order entry, dispatch and delivery functions.

ABOUT DM2

Since 1989, DM2 has been developing software and working to help diversified petroleum marketers to increase market share and improve profitability through automation. DM2, a Sage Software Master Developer and Reseller since 1991, uses Sage 100 and Sage CRM, ERP (enterprise resource planning) and CRM (customer relationship management) systems designed for general wholesale distribution applications, to develop, sell and support *Petroleum Insights*, a fully integrated accounting/ERP and CRM system designed specifically for petroleum marketers. DM2's *Petroleum Insights* system offers all of the core financials, fuel, lubricants, home heat/propane, cardlock, c-store, supply chain automation, advanced business analytics, customer relationship management, fixed assets, paperless office and eCommerce modules petroleum marketers need to manage and grow their businesses. DM2 is a proud member of the Sage Software President's Circle and has ranked as a Top 10 Sage 100 reseller since 1999.
